VII	(例) The graphs show that most students have a good impression of Romi. Romi looks very cute and friendly.													
	AI robots like Romi are useful for students who have many questions when we study. They are also helpful for													
	students who have few or no friends at school. However, it’s not good if some students only talk to AI													
	robots. They might lose the chance to develop important social skills through communicating with real people.
